SUMMARY

Senior full-stack and mobile engineer with 8 years designing, building, and shipping web and mobile products end to end. Strong across Angular, React, and Next.js on the frontend; Node.js, NestJS, and Fastify on the backend; and Flutter, Kotlin, and Swift on mobile. Proven record architecting micro-frontend and microservice platforms, leading cross-functional teams as technical lead, and integrating complex third-party systems for payments, KYC, and real-time market data. Currently delivering fintech systems as an independent consultant.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Dart, Kotlin, Swift, SQL

Frontend: Angular, React, Next.js, RxJS, Micro-frontend, Module Federation, Webpack

Backend: Node.js, NestJS, Fastify, Express.js, REST APIs, WebSockets, Microservices

Mobile: Flutter, Android (Kotlin, Jetpack Compose), iOS (Swift), SDK development

Data & Messaging: MySQL, MongoDB, Redis, Apache Kafka, RabbitMQ

Cloud & DevOps: AWS, Docker, Kubernetes, Jenkins, CI/CD, Git

Testing & Practices: TDD, Jasmine/Karma, SonarQube, System Design, Audit Logging

AI / ML (exploring): Local LLM inference, model fine-tuning, LoRA training

EXPERIENCE

Independent Software Consultant (Freelance)

Dec 2025 – Present

Senior Full-Stack & Mobile Engineer · Fintech (Finvasia — Shoonya, Jumpp)

Next.js · NestJS · MySQL · RabbitMQ · Redis · Kotlin / Jetpack Compose · Swift

- **Shoonya Ticketing** — Re-architected a 140K+ active-client broker's legacy ticketing into a standalone, event-driven microservice (Next.js, NestJS, RabbitMQ, Redis) as technical lead with a 4-developer team; delivered in 3 months and halved the flow from 4 steps to 2.
- Automated previously manual back-office steps — penny-drop bank verification (HyperVerge), e-sign/KYC (Digio), and payments (Razorpay) — within the ticket lifecycle, backed by a full audit-log layer.
- **Shoonya TV Charts** — Built a reusable Android module embedding TradingView Advanced Charts via a JavaScript⇌Kotlin bridge, a custom datafeed on Shoonya's EOD/TP-series APIs, and a real-time candle aggregator served on-device through an embedded web server.
- **IKF (I Know First)** — Shipped an Android feature module surfacing AI stock picks, holdings, and a full in-app subscription/payment lifecycle on a clean MVVM + Hilt architecture.
- **Jumpp (insurance)** — Building reusable native SDK modules (Kotlin/Jetpack Compose, Swift) for integration into Finvasia's primary app.

Key Achievement: Modernized core fintech systems — turning a monolithic ticketing flow into a scalable microservice and delivering reusable native mobile modules.

SimplifyVMS

Mar 2025 – Dec 2025

Senior Software Engineer · HireHQ (AI Direct-Sourcing & Hiring Platform)

Fastify (Node.js) · Angular 19 · MySQL · RabbitMQ · WebSockets

- **Re-architected a freelancer-built codebase for production** — restructured modules, hardened the Fastify + Angular 19 stack, and cleared a large bug backlog to improve stability and maintainability.
- Introduced RabbitMQ for asynchronous, event-driven service communication and WebSockets for real-time updates across the hiring workflow.

Key Achievement: Matured a freelancer-built prototype into a stable, event-driven platform fit for enterprise use.

Sapidblue Technologies

Jun 2022 – Mar 2025

Associate Principal Engineer

Angular 15/17 (Micro-frontend, Module Federation) · NestJS · MySQL · Flutter · Kafka · Redis

- **Sapidblue Accelerator** — Built a library of plug-and-play micro-frontend services (auth, communication, user & configuration management, retail, wallet, payments) on Angular + NestJS, usable standalone or composed to assemble new products fast.
- **XPRIZO** — As lead of the India team working directly with the client CTO, built a multi-currency fintech wallet from scratch: a Flutter app (Android & iOS) plus an Angular 17 back-office — live on Google Play & the App Store.
- **Cryr (US — credit reporting)** — Built credit-handling business logic on the Accelerator with a Kafka/Redis/MySQL microservice backend, Plaid integration, and a Flutter customer app.
- **PayPR (Trinidad)** — Delivered a wallet-based financial app on the Accelerator services.

★ Represented Sapidblue alongside the CEO at the World Blockchain Summit, Dubai (Mar 2023).

NovelVox Software India

Jan 2021 – Jun 2022

Senior Software Engineer · CXInfinity (Omnichannel Customer Engagement)

Angular · Node.js · WebRTC (Janus) · WebSockets

- **Built Facebook & Twitter social integrations** for CXInfinity so agents handle social conversations alongside every channel in one console.
- **Engineered WebRTC audio/video calling** on the Janus media server, plus chat, SMS, and co-browse over Node.js + WebSockets.

★ *Rising Star* — annual company award.

Wipro Limited

Mar 2020 – Jan 2021

Software Engineer

Angular 8 · Web Components · IndexedDB

- Built reusable Angular 8 Web Components with IndexedDB for offline-capable storage.
- Migrated the UPoint UI from Angular 4 to Angular 8, improving performance and usability.

Skilrock Technologies

Jun 2018 – Mar 2020

Software Engineer

Angular 6 · Node.js · MongoDB · MySQL

- Built a web dashboard and REST APIs for a Retail Management System (Angular 6, Node.js, MongoDB, MySQL).
- Designed a scalable, maintainable 3-tier dashboard for managing scratch-based games.
